# Kamikaze Soldier

My name is Abe. I was born on May 11, 1926 in Shinagawa Tokyo, Japan. Our family was lower-middle class. Our house was small but everything was comfortable. I entered elementary school when I was six years old. All the teachers said I was a bad student, but I really wasn't bad. Instead I was just mischievous and rambunctious. My childhood was normal, but my young, adult life certainly wasn't.

When I graduated from junior high school in 1942, I went to work for the Harley Davison Company Ltd. They opened a branch in Tokyo and I got an entry-level job doing basic labor. I started to study English very hard. I really liked English. During this time the social-political climate in Japan began to change a lot. Just one year earlier, Japan fully entered World War II. I continued to study English and work. But eventually I had to quit my Harley Davison job. I can't remember exactly, but I think the American company had to pull out of Japan. In 1944, studying English became illegal! People caught studying English were put in jail, sent to labor camps, or drafted into the military. However, I continued to study in secret by myself. I didn't tell anyone because I was scared.

My life changed even more drastically in June 1945. I was drafted into the Japanese Navy. I had no choice but to join. For many young men the Japanese Military meant a death sentence. Some of my friends tried to run away, but were shot by the military police (MP). In the Japanese military there were three branches of kamikaze: the navy, army, and air force. I was forced to train with the navy kamikazes. In this camp, we learned how to use a one-man submarine loaded with a lot of explosives. These submarines only carried enough fuel to reach its target. The kamikazes never had enough fuel for a return trip. We knew we had to die either from an explosion or by drowning. This time in my life was difficult. I was planning my own death. While training in the camp, I saw many of my friends go to war, and never come back. But fortunately for me, something great happened.

On September 2, 1945 American General MacArthur and Japanese General Umezu signed a treaty to end World War II. Although I trained to be a kamikaze, I never went to war. I was one of the lucky ones. I was released back to the civilian population. Soon I started to work for the American Eighth Army. Japan was so weak at this time that the USA had to rebuild our country. Because I was one of the few who could speak English, the US Army depended on me to translate their commands. The Japanese yakuza (mafia) recruited Japanese laborers to do work and I interpreted for everyone. I received the most money among the Japanese people I was working with. I started to earn a lot of respect from both the army sergeants and the yakuza. One army sergeant, John Casey, really liked me. In 1947, I started to work for him as a number-one resident houseboy. I was the only one who passed the English test. At that time, this was a good job with good pay.

However, in 1949 Casey retired and went back to the USA and I lost my job. I soon had to start regular work among the Japanese population, so I became a taxi driver in Kichijoji, Tokyo. Later I started my own cleaning business. But I always studied English as a hobby. I'll never forget my days as a young man. Now I'm an old man, but I still enjoy practicing English with my teacher.
